

Care and Feeding of the Rotax 912

The Rotax 912 series engine powers about 80% of the Light Sport Aircraft fleet. It has the best power to weight ratio in its class, but differs significantly from the more familiar Lycoming and Continental engines commonly seen in General Aviation. This FAA Safety Team Wings and AMT Award seminar will help pilots and owner/operators to better understand the design characteristics and operating requirements of this popular engine, allowing you to fly it safely to TBO, and beyond. Don't miss this exclusive event. Click on the link below and register TODAY.

Directions: T-hangar, Sport Aviation Expo Forum Area.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASTeam) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
